NORTHWIND SALES PERFORMANCE

Interactive Sales Dashboard
Business Insight Report

Prepared by	A.Vetriselvan
Course	B.Com FAI
Date	9 October 2026
Report focus	Orders, Sales, Quantity, Freight, Customers, Category, Country & Employee Performance

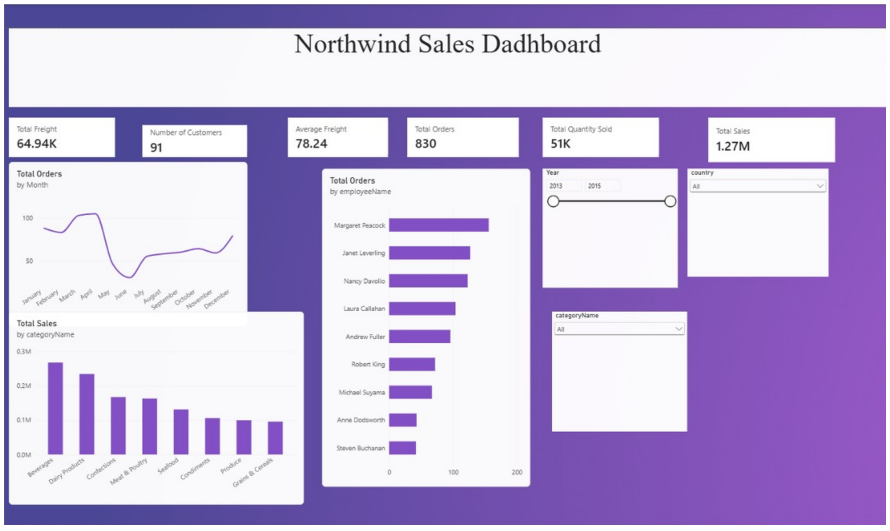

Figure 1. Northwind Sales Dashboard.

1. Introduction

The Northwind Sales Dashboard gives an interactive view of business performance using key order, sales, quantity, freight and customer measures. It brings together KPI cards, a monthly order trend, category sales, employee performance and a customer and product analysis in one visual report built in Power BI.

The main purpose of the dashboard is to turn a large sales dataset into a simple management view. Instead of checking individual records one by one, users can compare overall performance and use the Year, Country and Category filters to focus on a particular part of the business.

2. Dashboard Overview

The report has four pages: **Sale Overviews**, **Products & Customer analysis**, **Sale Dashboard** and **Tool tips**. The overview page contains six headline KPI cards: Total Freight, Number of Customers, Average Freight, Total Orders, Total Quantity Sold and Total Sales. Below the KPIs are a line chart of orders by month, a bar chart of sales by category and a bar chart of orders by employee. A second page shows the number of customers by country together with a product-level table.

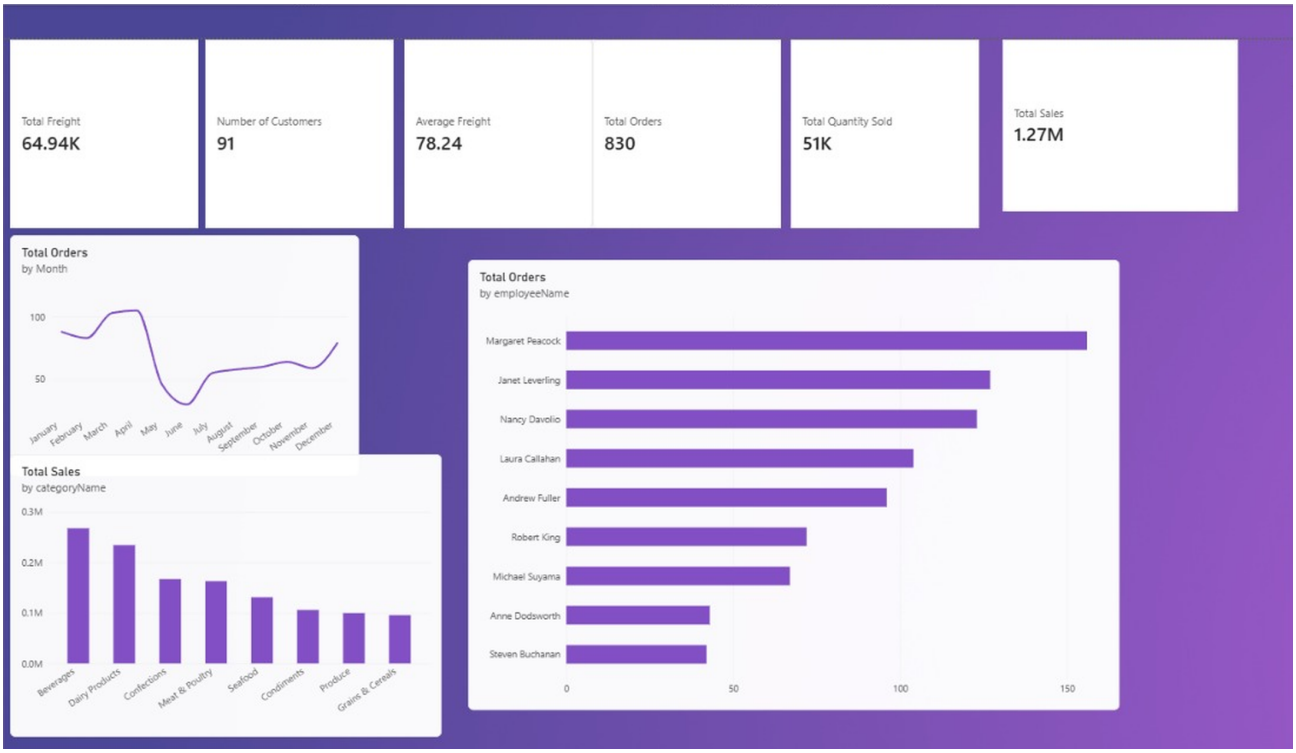

Figure 2. Dashboard overview showing KPI cards, monthly orders, category sales and employee orders.

3. KPI Analysis

The KPI cards give a quick summary of the overall operational and financial position shown in the dashboard. The values visible in the supplied screenshots are summarised below.

KPI	Displayed value	Interpretation
Total Orders	830	Total number of orders placed in the selected period.
Total Sales	1.27M	Overall sales value (1,265,793.04 in the product table).
Total Quantity Sold	51K	Approximately 51 thousand units sold (51,317 exactly).
Total Freight	64.94K	Total shipping cost associated with the orders.
Average Freight	78.24	Average freight charge per order.
Number of Customers	91	Distinct customers who placed orders.

Several useful ratios can be calculated from the displayed totals:

- **Average sales per order:** 1,265,793 / 830 = approx. 1,525.
- **Average quantity per order:** 51,317 / 830 = approx. 62 units.
- **Average selling value per unit:** 1,265,793 / 51,317 = approx. 24.67.
- **Average sales per customer:** 1,265,793 / 91 = approx. 13,910.
- **Orders per customer:** 830 / 91 = approx. 9.1 orders.
- **Freight as a share of sales:** 64.94K / 1.27M = approx. 5.1%.

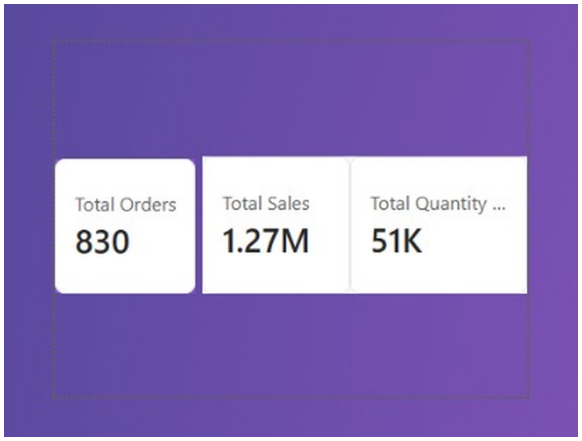

Figure 3. Headline KPI cards: Total Orders, Total Sales and Total Quantity Sold.

4. Category Sales Analysis

The Total Sales by categoryName chart ranks eight product categories. Beverages is the leading category at roughly 0.27M, followed by Dairy Products at about 0.23M. Confections and Meat & Poultry come next at roughly 0.17M and 0.16M, while Seafood, Condiments, Produce and Grains & Cereals each fall between about 0.09M and 0.13M.

Together, Beverages and Dairy Products contribute close to 40% of total sales, and Beverages sells almost three times as much as Grains & Cereals. Sales are therefore not evenly spread across categories.

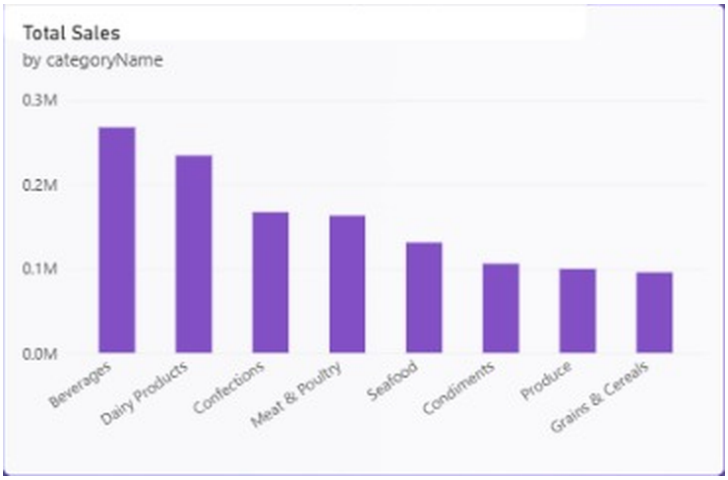

Figure 4. Total Sales by category.

5. Monthly Order Trend Analysis

The Total Orders by Month line chart shows a clear seasonal pattern. Orders are strong from January to April, reaching a peak of about 105 in March and April, and then fall sharply to a low of about 30 in June. They recover to around 55-65 in the second half of the year and rise again to about 79 in December.

The low May and June values should be read with the Year filter in mind, because they may reflect the months covered by the selected years rather than a real fall in demand.

Figure 5. Total Orders by month.

6. Employee Performance Analysis

The Total Orders by employeeName chart compares nine employees. Margaret Peacock handled the most orders (about 156), followed by Janet Leverling (about 127) and Nancy Davolio (about 123). Laura Callahan and Andrew Fuller follow with roughly 104 and 96 orders.

At the lower end, Robert King (about 72), Michael Suyama (about 67), Anne Dodsworth (about 43) and Steven Buchanan (about 42) handled fewer orders. The top three employees together account for roughly half of all 830 orders, and the top performer handled almost four times as many orders as the lowest.

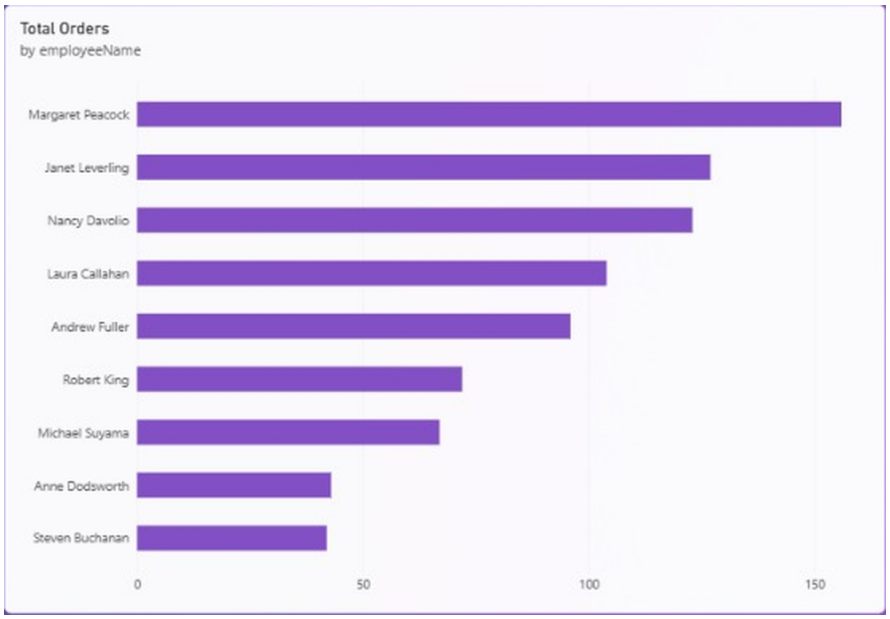

Figure 6. Total Orders by employee.

7. Customer Analysis by Country

The Number of Customers by country chart shows that the 91 customers are spread across 21 countries. The USA has the most customers (13), followed by France and Germany (11 each), Brazil (9) and the UK (7). These top five countries account for 51 of the 91 customers, which is about 56%.

Mexico and Spain have 5 customers each, Venezuela has 4, and Argentina, Canada and Italy have 3 each. Seven countries have 2 customers each, while Ireland, Norway and Poland have only 1, which shows room for market growth.

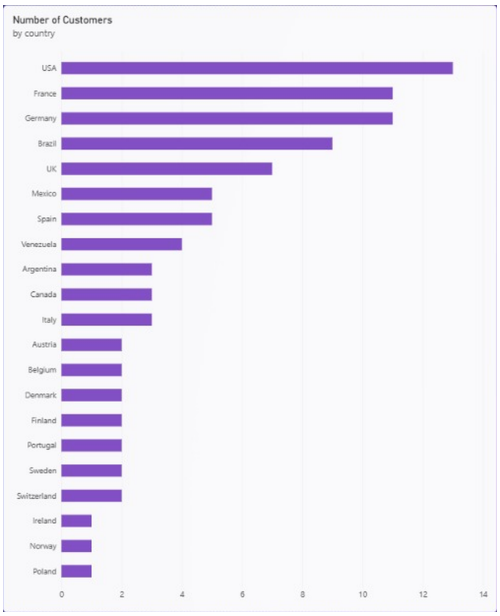

Figure 7. Number of customers by country.

8. Product-Level Performance

The product table lists productName, categoryName, Total Sales and Total Quantity Sold. The visible rows show large differences between products. The standout is **Côte de Blaye** (Beverages) with sales of 141,396.74 on 623 units, which alone is about 11% of total sales. Other strong products among the visible rows include Camembert Pierrot (46,825.48), Gnocchi di nonna Alice (42,593.06), Alice Mutton (32,698.38) and Carnarvon Tigers (29,171.88).

In contrast, products such as Aniseed Syrup (3,044.00), Genen Shouyu (1,784.83), Gravad lax (2,688.40) and Chocolade (1,368.71) contribute very little. The table total is 1,265,793.04 in sales and 51,317 in quantity, which matches the compact values on the KPI cards (1.27M and 51K).

productName	categoryName	Total Sales	Total Quantity Sold
Alice Mutton	Meat & Poultry	32,698.38	978
Aniseed Syrup	Condiments	3,044.00	328
Boston Crab Meat	Seafood	17,910.63	1103
Camembert Pierrot	Dairy Products	46,825.48	1577
Carnarvon Tigers	Seafood	29,171.88	539
Chai	Beverages	12,788.10	828
Chang	Beverages	16,355.96	1057
Chartreuse verte	Beverages	12,294.54	793
Chef Anton's Cajun Seasoning	Condiments	8,567.90	453
Chef Anton's Gumbo Mix	Condiments	5,347.20	298
Chocolade	Confections	1,368.71	138
Côte de Blaye	Beverages	1,41,396.74	623
Escargots de Bourgogne	Seafood	5,881.68	534
Filo Mix	Grains & Cereals	3,232.95	500
Flotemysost	Dairy Products	19,551.03	1057
Geitost	Dairy Products	1,648.13	755
Genen Shouyu	Condiments	1,784.83	122
Gnocchi di nonna Alice	Grains & Cereals	42,593.06	1263
Gorgonzola Telino	Dairy Products	14,920.88	1397
Grandma's Boysenberry Spread	Condiments	7,137.00	301
Gravad lax	Seafood	2,688.40	125
Guarana Fantastica	Beverages	4,504.37	1125
Gudbrandsdalsost	Dairy Products	21,942.36	714
Gula Malacca	Condiments	9,915.95	601
Gumbär Gummibärchen	Confections	19,849.14	753
Gustaf's Knäckebröd	Grains & Cereals	7,122.36	348
Ikura	Seafood	20,867.34	742
Inlagd Sill	Seafood	13,458.46	805
Ipoh Coffee	Beverages	23,526.70	580
Jack's New England Clam Chowder	Seafood	8,680.35	981
Konbu	Seafood	4,960.44	891
Lakkalikööri	Beverages	15,760.44	981
Laughing Lumberjack Lager	Beverages	2,396.80	184
Longlife Tofu	Produce	2,432.50	297
Louisiana Fiery Hot Pepper Sauce	Condiments	13,869.89	745
Louisiana Hot Spiced Okra	Condiments	3,383.00	239
Total		**12,65,793.04**	**51317**

Figure 8. Product-level sales and quantity table (scrollable in the dashboard).

9. Interactive Filters and Dashboard Use

The dashboard provides a Year range slider (2013 to 2015) together with Country and categoryName drop-down filters. These controls make the dashboard interactive: users can narrow the analysis to a selected period, country or product category and see how the KPI cards and charts change.

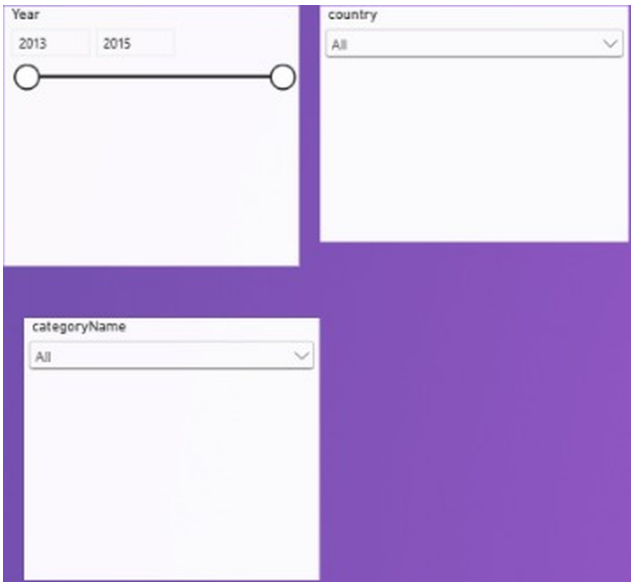

Figure 9. Year slider and Country / Category filters.

10. Key Business Insights

1 The business recorded 830 orders and 1.27M in sales from 91 customers, with 51K units sold.

2 The average order is worth about 1,525, and each customer placed about 9 orders on average.

3 Freight is about 5.1% of sales, with an average of 78.24 per order.

4 Beverages and Dairy Products are the strongest categories, together close to 40% of sales.

5 Orders are seasonal: highest in March and April and lowest in June.

6 Employee workload is uneven: the top three employees handle about half of all orders.

7 Customers are concentrated in the USA, France, Germany, Brazil and the UK (about 56%).

8 A single product, Côte de Blaye, contributes about 11% of total sales.

11. Recommendations

- Focus inventory and marketing on Beverages and Dairy Products, and investigate why Produce and Grains & Cereals lag behind.
- Prepare stock and staffing ahead of the March-April peak, and plan promotions to lift orders in the weaker May-June period.
- Balance order allocation across employees so that workload is shared more evenly, and compare order counts with sales value for fair target setting.
- Protect and grow the top customer countries, and run targeted campaigns in countries with only one or two customers.
- Reduce dependence on a few high-selling products such as Côte de Blaye, and review pricing or promotion for low-selling items.
- Monitor freight cost regularly and look for cheaper shipping options to keep it below its current share of sales.

12. Conclusion

The Northwind Sales Dashboard provides a compact and interactive way of understanding business performance. The supplied screenshots show a business with 830 orders, 1.27M in sales, 51K units sold, 64.94K in freight and 91 customers across 21 countries. The combination of KPI cards and monthly, category, employee, country and product views supports both quick monitoring and deeper investigation.

Overall, the dashboard can be used as a practical management tool for sales planning, product prioritisation, customer and country analysis, shipping cost control and employee performance review.
